AnimalTalk Access

*Is designed to bring about significant improvement
in any Animal's health
using five simple techniques & a Fast Aid Procedure.
Presented in a day & a half seminar!*

*Linking awareness with body, mind, spirit,
of
Animals & Humans*

March 13/14, 2010
St Claire Stud at Rosewood
95 Killearn Road
Launching Place, VIC 3139
Australia

Course Fee: \$350.00 AUS
Early Bird (register 3 wks in advanced) \$300.00 AUS
Coordinator: Eric Thomas
eric@photonicttherapyvictoria.com
Phone: 03 5961 5571 Cell: 04 3986 4022

You'll be learning 5 basic techniques & Fast-aid procedure!

Providing the layperson and professional
with a simple set of energy based
techniques to make health maintenance
and the management of daily health
challenges for Animals accessible.

CORTICES: The Cortices technique is designed to improve and balance the communication between the two halves of the Animal's brain. (It's like hitting the reset button on the brain's computer.) This will improve the efficiency of the brain, thereby improving overall health in the Animal. Specific immediate effects for the Animal include improvements in thinking ability, memory, concentration, stress reduction, feelings of wellbeing, and general physiological functioning of the body.

SB JUNCTION: The Spheno-Basilar Junction technique is designed to release the SB of the Animal. The Animal's breath scans the frequencies of the body and allows for the brain to determine what frequencies need to be addressed, it is important that the juncture be mobile. Animals with a restricted SB may exhibit dizziness, 'foggy' head, difficulty maintaining balance, general body weakness, bleeding from ears, poor memory, tension headaches, depression, endocrine and digestive system disorders.

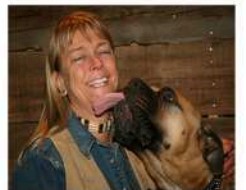

HYDRATION: The Animal's body is 70- 80% water. All physiological processes in the cells, nerves, organs, and other structures are dependant upon a good supply of water. Very often the transportation of water across the cell membranes is compromised. The Hydration technique helps to correct the Animal's body's ability to fully utilize the water it has available, thereby greatly improving the efficiency of all physiological processes.

BODY CHEMISTRY: This technique is designed to stimulate the immune system into addressing many chronic and acute conditions. Often, viruses, bacteria, parasites, allergies, food intolerances, and accumulated toxins are not effectively addressed by the immune system because of various imbalances in the Animal's body. This technique can correct these imbalances so that the Animal's body can then restore health without the need for drug intervention.

RECIPROCALLS: The integrity of the structure of the Animal's body is critical for the Animal living a healthy and mobile life. The co-ordination of the muscles, balance of the muscle tone, and the unrestricted flow of energy through the Animal's body are all critical to healthy functioning at all levels of the Animal's body mind complex. The Reciprocals technique reestablishes the integrity of the structures of the Animal's body and can have significant effect on many forms of injuries, arthritis, circulatory issues, co-ordination patterns, spinal problems, etc.

FAST AID TECHNIQUES: ANIMALTALK ACCESS also includes an effective fast aid system that is non-invasive, safe, and very simple. It will resolve simple issues as a stand alone technique. In serious conditions it is designed to be used safely until specialized Veterinary care is available.
